

# What we have, what we need to add, and how they compare

Three views of the same audit: current CRM capabilities on their own, the additional features the lead-to-alumni spec requires on their own, and a final side-by-side comparison across all 17 modules from Sarada Prasad's email.

## 1 What we have today

Working, shipped features already in the codebase, grouped by area.

| AREA          | FEATURE                                                         | EVIDENCE                                              |
|---------------|-----------------------------------------------------------------|-------------------------------------------------------|
| Lead capture  | Meta/Facebook & Instagram Lead Ads webhook (auto lead creation) | <code>server/index.js:4360</code>                     |
|               | Google Sheets bulk lead sync                                    | <code>syncGoogleSheet()</code>                        |
|               | Website inquiry form → CRM lead                                 | <code>PublicInquiry.jsx</code>                        |
|               | Duplicate lead detection (mobile/email)                         | <code>/api/leads/check-duplicate</code>               |
|               | Round-robin counsellor auto-assignment                          | <code>getNextAssignee()</code>                        |
|               | Lead stage tracking (Untouched → Payment Success)               | <code>leads.stage</code>                              |
| Qualification | Lead quality/priority scoring                                   | <code>calculateLeadScore()</code>                     |
| Counselling   | Role-scoped counsellor dashboard                                | <code>Dashboard.jsx</code>                            |
|               | Call logging, click-to-call, call outcomes                      | <code>call_logs</code> , <code>ClickToCall.jsx</code> |
|               | WhatsApp / SMS / RCS / email communication logs                 | <code>whatsapp_logs</code> , <code>email_logs</code>  |
|               | Follow-up scheduling + morning "untouched leads" reminder       | <code>follow_up_date</code> , cron job                |
|               | Free-text counselling notes                                     | Student File → Notes tab                              |

| AREA               | FEATURE                                                               | EVIDENCE                            |
|--------------------|-----------------------------------------------------------------------|-------------------------------------|
| <b>Application</b> | Auto-created application on Process for Payment                       | <code>ApplicationDetails.jsx</code> |
|                    | Auto-generated application number                                     | <code>CUEEAP26 ...</code>           |
|                    | Document upload, verify/reject workflow                               | Documents tab, verify/reject routes |
|                    | Counsellor ownership + transfer approvals                             | <code>TransferApprovals.jsx</code>  |
| <b>Payment</b>     | Razorpay online payment + offline/UTR payment                         | <code>server/index.js:5609</code>   |
|                    | Payment approval workflow, auto-sent admission letter                 | Payments page → Approve             |
| <b>Automation</b>  | Multi-step, multi-channel Drip Workflows                              | <code>DripWorkflows.jsx</code>      |
| <b>Dashboards</b>  | Management, Counsellor, Analytics, Reports, Productivity, Leaderboard | 6 distinct dashboard/report pages   |
| <b>Chatbot</b>     | Rule-based FAQ widget on landing page                                 | <code>ChatWidget.jsx</code>         |
| <b>Platform</b>    | Multi-tenant CRM (separate org per client, own login URL/branding)    | <code>PlatformTenants.jsx</code>    |

## 2 Additional features we need to add

What the lead-to-alumni spec calls for that has no equivalent in the codebase today — this is the real build list.

| AREA                 | FEATURE TO BUILD                                                                    | PRIORITY           |
|----------------------|-------------------------------------------------------------------------------------|--------------------|
| <b>Lead capture</b>  | UTM/campaign-parameter capture on every lead; LinkedIn Lead Ads ingestion           | • <b>NEAR-TERM</b> |
| <b>Qualification</b> | Eligibility fields (marks/board) + automated qualification rules gating stage moves | • <b>NEAR-TERM</b> |

| AREA                     | FEATURE TO BUILD                                                                              | PRIORITY    |
|--------------------------|-----------------------------------------------------------------------------------------------|-------------|
| <b>Counselling</b>       | Programme recommendation engine, EMI/fee info surfaced to counsellors, counsellor FAQ/KB      | • NEAR-TERM |
| <b>Fees</b>              | Fee-structure config (per programme), semester-fee model, EMI/installment tracking, refunds   | • NEAR-TERM |
| <b>Onboarding</b>        | Student ID generation, onboarding checklist, LMS account provisioning, orientation scheduling | • PHASE 2   |
| <b>Academic services</b> | LMS integration: enrollment, attendance, engagement, academic support tickets                 | • PHASE 2   |
| <b>Exams</b>             | Assignment status, exam registration, hall ticket, results, backlog tracking                  | • PHASE 3   |
| <b>Continuation</b>      | Semester re-registration workflow, fee-due reminders, dropout/re-engagement tracking          | • PHASE 3   |
| <b>Completion</b>        | Credit completion tracking, certificate/degree status, convocation info                       | • PHASE 3   |
| <b>Placement</b>         | Career profile, resume, placement drives, interview + offer tracking                          | • PHASE 4   |
| <b>Alumni</b>            | Alumni database, events, networking, referrals, continuous-learning offers                    | • PHASE 4   |
| <b>Automation</b>        | Generic event-trigger engine (payment pending → reminder, doc rejected → notify, etc.)        | • NEAR-TERM |
| <b>Dashboards</b>        | Academic/Operations dashboard, Placement dashboard, Alumni dashboard                          | • PHASE 2-4 |
| <b>Website</b>           | Full programme-discovery site: programme pages, faculty, testimonials, brochures              | • NEAR-TERM |
| <b>Chatbot/Voicebot</b>  | AI-backed chatbot wired into CRM lead creation; voicebot for calls/reminders                  | • NEAR-TERM |
| <b>Analytics</b>         | Google Analytics, Meta Pixel/CAPI, UTM attribution, cost-per-lead/admission                   | • NEAR-TERM |

### 3 Final comparison table

All 17 modules from the email, side by side against current implementation status.

| #  | MODULE (TARGET SPEC)            | STATUS    | HAVE VS. NEED, IN ONE LINE                                            |
|----|---------------------------------|-----------|-----------------------------------------------------------------------|
| 1  | Lead Generation                 | ● PARTIAL | Have: Meta capture, dedup, auto-assign. Need: UTM tracking, LinkedIn. |
| 2  | Lead Validation & Qualification | ● PARTIAL | Have: lead scoring. Need: eligibility fields, qualification rules.    |
| 3  | Enquiry + Counselling           | ● PARTIAL | Have: calls/WhatsApp/follow-ups. Need: recommendations, EMI info, KB. |
| 4  | Application & Admission         | ● EXISTS  | Have: full lifecycle, working end-to-end. Need: nothing major.        |
| 5  | Fee & Payment                   | ● PARTIAL | Have: Razorpay + offline payment. Need: fee config, EMI, refunds.     |
| 6  | Student Onboarding              | ● MISSING | Have: nothing. Need: entire module.                                   |
| 7  | Academic Services               | ● MISSING | Have: nothing (no LMS link). Need: entire module.                     |
| 8  | Assignments & Examinations      | ● MISSING | Have: nothing. Need: entire module.                                   |
| 9  | Re-registration / Continuation  | ● MISSING | Have: nothing. Need: entire module.                                   |
| 10 | Programme Completion            | ● MISSING | Have: nothing. Need: entire module.                                   |
| 11 | Placement & Career Services     | ● MISSING | Have: marketing copy only. Need: entire module.                       |
| 12 | Alumni Management               | ● MISSING | Have: marketing copy only. Need: entire module.                       |
| 13 | Automation                      | ● PARTIAL | Have: campaign drip sequences. Need: generic event-trigger engine.    |

| #  | MODULE (TARGET SPEC)              | STATUS    | HAVE VS. NEED, IN ONE LINE                                                   |
|----|-----------------------------------|-----------|------------------------------------------------------------------------------|
| 14 | CRM Dashboards                    | ● PARTIAL | Have: Sales/Management dashboards.<br>Need: Academic/Placement/Alumni views. |
| 15 | Website (cuedu.in)                | ● PARTIAL | Have: one landing page. Need: full programme-discovery site.                 |
| 16 | Chatbot / Voicebot                | ● PARTIAL | Have: static FAQ widget. Need: AI chatbot wired to CRM, voicebot.            |
| 17 | Analytics & Marketing Integration | ● MISSING | Have: nothing. Need: GA/Pixel/UTM + attribution + CPL/CPA.                   |

Prepared from a full-repo audit of the CCRM codebase — every claim above is backed by a specific route, table, or file.
